

World Wide EPS Meeting 2016

Presentation

More than 300 students from the Polytechnic School participated in the presentations of the mobility programs of the different foreign universities, which took place at the second World Wide EPS Meeting (WWEPS) [

The Polytechnic School of the University of Lleida considers the process of internationalization of the center a key aspect. On the one hand, for its own establishment and strengthening as a reference center. On the other hand, for the professional future of its students. This process allows us to face the future with optimism and a global and open vision of the world. The director of the Polytechnic School, Francesc Giné, defends that "the future professionals who have arisen from the Polytechnic School must be able to face their future job challenges with the maximum guarantees of success, understand and visualize in a global way the authentic and excellent job opportunities that are offered on a European and global scale". With this sentence, Giné also wants to promote the internships in companies abroad.

The deputy director of International Relationships of the Polytechnic School, Cristian Solé, explains that "the School objective is, in the future, to enjoy of a double international degree in each of the degrees and master's degrees of the School". Nowadays, the offer of international double degrees is:

- [Double Degree in Technical Architecture and Edification, and Civil Engineering \(VIA UC - Denmark\)](/sites/Eps/export/sites/EpsNou/docs/noticies/2016/wwepsmeeting2016.pdf) [</sites/Eps/estudis/ArquitecturaTecnica-CivilEngineering.html>]
- [Double Degree in Mechanical Engineering i Energy and Environmental Engineering \(NOVIA UAS - Finland\)](/sites/Eps/export/sites/EpsNou/docs/noticies/2016/wwepsmeeting2016.pdf) [</sites/Eps/estudis/EnginyeriaMecanica-EnergyandEnvironmentalEngineering.html>]
- [Double Master's Degree in Computer Engineering and Computer Science \(ITB - Indonesia\)](/sites/Eps/export/sites/EpsNou/docs/noticies/2016/wwepsmeeting2016.pdf) [</sites/Eps/estudis/EnginyeriaInformatica-ComputerScience.html>]

WWEPS started last Thursday with the activity presentation by Mrs. **Àstrid Ballesta**, vice rector of International Relationships and Cooperation of the University of Lleida, and a talk by professor Carlo Noé, [SEFI](http://www.sefi.be/) [<http://www.sefi.be/>] (European Society for Engineering Education) representative.

Then each institution conducted a presentation for the students from Polytechnic School, and also for high school students from some schools that accepted the invitation to the event: Col·legi Santa Anna, Institut Gili i Gaya, Col·legi Mater Salvatoris, Ilerna, Institut Màrius Torres i Institut Josep Lladonosa.

As well, during these presentations, current Polytechnic School students who are currently enjoying an experience of international mobility in these universities, explained via video to attendees their experience and how this fact is influencing the progress of their studies and their life.

The objective is to show that the city of Lleida is attractive as a destination for international students and, furthermore, that it has enough potential at university, business and industrial level to establish relationships with other university institutions around the world. That is why, in addition to strictly academic activities, visiting professors were also able to enjoy a guided tour around the city, with special emphasis on the Seu Vella of Lleida, a wine tasting and dinner at the winery SOMMOS D.O. Somontano de Barbastro (Huesca) and a cultural visit to the Romanesque churches at Vall de Boí.

The second conference of WVEPS was organized as a fair, where each institution had its own stand where they personally received each and every one of the students interested in their mobility offer and explained to them and clarified any of the doubts and concerns they might have.
